TOP SECRET
Attention Special Agent 4125
Elvin Atombender Back in Power!
It has been just two short years since Elvin Atombender was vanquished. Your supreme efforts, 4125, helped prevent global domination and anarchy. But now, like a phoenix from the ashes, Elvin has risen once again. Reports from the country indicate that Elvin has established a new stronghold, the head-quarters of which is a five tower complex.
Early reports indicate the presence of guards, robots, mines and trap doors. Only one person has the vital knowledge to find the code numbers, keys and objects; the ability to negotiate the maze of elevators; and the strength to outwit Elvin himself. So once again we must ask you to make the supreme sacrifice. We are aware that it is a mission from which there may be no return, but we have to put our trust in you, if global destruction is not to result.
Your mission starts today.
We wish you good luck and God's speed.
I.M.A. Special Terrorist Unit.
